Software Requirements Specification (SRS)
DLASS – Digital Local Appointment Scheduling System

1. Introduction

1.1 Purpose

This document specifies the software requirements for DLASS, a web-based Digital Local Appointment Scheduling System designed to manage and optimize appointments for local service providers.

1.2 Scope

DLASS enables users to discover local services, book appointments, make payments, and receive notifications. Service providers can manage schedules, handle emergencies, and view analytics dashboards.

1.3 Definitions, Acronyms, Abbreviations

DLASS – Digital Local Appointment Scheduling System

FCFS – First Come First Serve

API – Application Programming Interface

2. Overall Description

2.1 Product Perspective

DLASS is a three-tier web application consisting of a React-based frontend, a Spring Boot backend, and MongoDB database.

2.2 User Classes

- User (Customer)

- Service Provider

- Admin

2.3 Operating Environment

- Web Browser
- Java 17+, Spring Boot
- MongoDB
- Node-based frontend tooling

3. System Features

3.1 User Features

- Service discovery by category and pincode
- Appointment booking (FCFS)
- Online payments
- Notifications (in-app and email)

3.2 Service Provider Features

- Service and slot management
- Emergency shutdown and rescheduling
- Business analytics dashboard

3.3 Admin Features

- Provider verification
- Category management
- Platform monitoring

4. External Interface Requirements

4.1 User Interface

Web-based UI built with React.js

4.2 Software Interfaces

- Payment Gateway API
- Google Business Profile links
- Email (SMTP)

5. Non-Functional Requirements

- Security: JWT authentication
- Performance: Scalable REST APIs
- Reliability: Email + in-app notifications
- Usability: Simple and intuitive UI

6. Constraints

- No map integration
- No SMS/WhatsApp notifications
- Open-source tools only

7. Future Enhancements

- Advanced AI-based analytics
- Mobile application support

8. Conclusion

DLASS provides a scalable and performance-driven solution for managing local service appointments.
